

## Bug Fixes and Enhancements

### Vigo TMS Menu:

#### Discover the new Vigo News Feed Homepage

Your central hub for essential updates, product releases, and the latest news from Vigo — all designed to keep you informed and up to date with what matters most.

### Order Entry:

VE-6295 Added new functionality to allow entry of Eire Codes in TMS Job Entry (*requires subscription from third party*)

VE-10614 Resolved issue where copied Consignments with Extra Charges would calculate fuel based on the full original amount, due to some sites selecting to copy revenue fields.

VE-10623 Resolved issue where copied Consignments would not always have a Unit Code Description populated.

### Consignments Grid:

VE-2155 Resolved issue where the filters and layouts drop downs within the lists didn't display in the sort order configured.

### Planning:

VE-454 Resolved issue where un-planned works orders grids incorrectly showed Collection Notes when the SalesOrderInformation.DeliveryInformation.ManifestNotesx fields are used in the grid design.

VE-10571 Sub Contractor Export CSV now includes an additional field at the end containing "Delivery Mobile Number".

VE-11710 Resolved issue where the filters and layouts drop downs within the lists didn't display in the sort order configured.

VE-11327 Added additional information into Send to Handset screen in PlanIT. Now includes Driver Code and Mobile Number.

VE-1277 Resolved issue where re-planning to different Hubs through PlanIT would cause a deletion message to send to Pallet-Track Hub where there was no routing configured for the Hub being re-planned to.

## Billing & Pricing:

VE-8111 Resolves issue with Daily Invoicing not splitting jobs based on Collection Date.

VE-8854 Sub-Contractor Reconciliation module now allows users to select multiple schedules concurrently to assign costs.

VE-9206 New functionality to allow Pricing based on County for Irish work (see Master Data).

VE-10626 Resolved issue where applying a filter in the Schedule Reconciliation module would cause the TMS to crash.

VE-11220 Added new functionality to calculate VAT rates by Country Code (see Master Data).

VE-11707/11791/11794 Resolved issue where the filters and layouts drop downs within the lists didn't display in the sort order configured (Release Jobs grid, Manage Sundries grid, Manage Invoices grid).

VE-11936 Resolved issue where Inactive Customers were available to use in Quick Quotes module.

## Master Data:

VE-8228 Resolved issue in new Portal Migrator where it would fail to upload Addresses due to "Address Code already exists" error.

VE-9206 New functionality to allow Pricing based on County for Irish work.

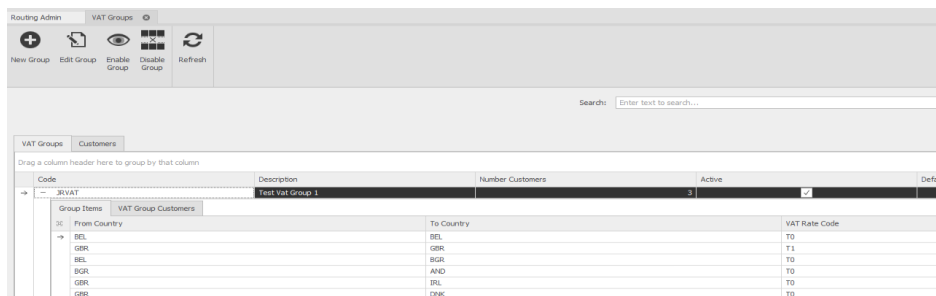

Two Way	From Country	From Type	From Location	To Country
<input checked="" type="checkbox"/>	IRL	County	DONEGAL	
<input checked="" type="checkbox"/>	IRL	Zone	DONEGAL	
<input checked="" type="checkbox"/>	IRL	Postcode	DONEGAL	
		Town		
		County		
		XXX		

VE-9206 New functionality to allow Auto-Routing based on County for Irish work.

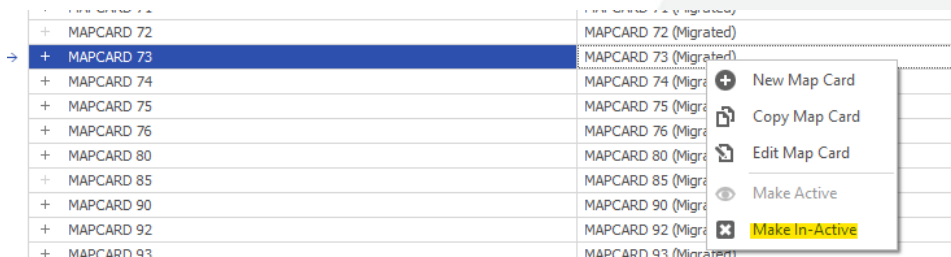

Country: Ireland <a href="#">Collapse All</a> <a href="#">Select All</a>						
	Country	Post...	Town	County Override	Pri...	Hub
→	▼	A				
<input type="checkbox"/>		A41	Ballyboghil	Louth	1	OWN\MAIN
<input type="checkbox"/>		A42	Garristown	Donegal	1	OWN\MAIN
<input type="checkbox"/>		A45	Ballyboghil	Waterford	1	OWN\MAIN
<input type="checkbox"/>		A63	Altadore		1	OWN\MAIN
<input type="checkbox"/>		A67	Ballinacdash		1	

VE-10611 Resolved error exporting Map Card Postcode list to Excel.

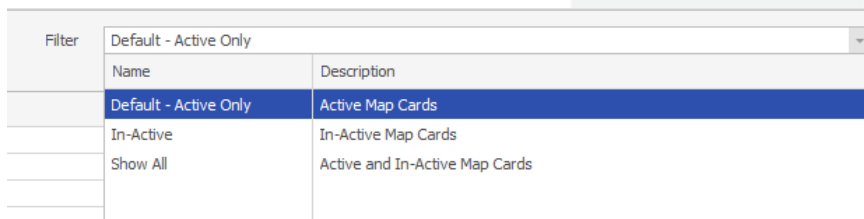

VE-11220 Added new functionality to calculate VAT rates by Country Code. To configure the VAT Country Groups, use the "VAT Management" program in System Admin:

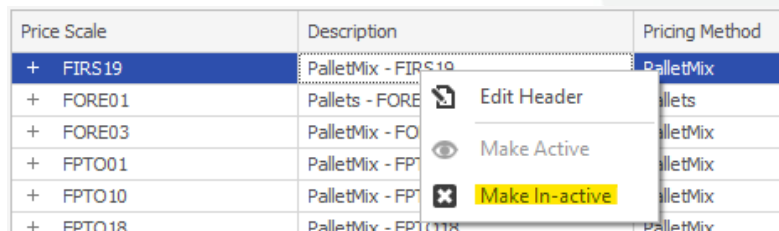

VE-11600 Added new functionality to set Map Cards as "In-Active":

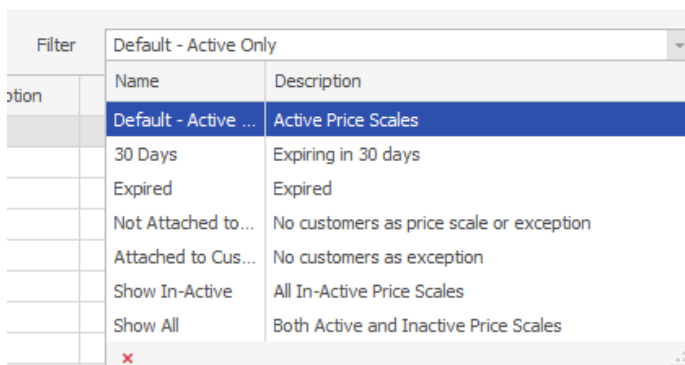

Any Map Cards set as In-Active can be seen using the new filters:

VE-11659 Added new functionality to set Price Scales as "In-Active":

Any Price Scales set as In-Active can be seen using the new filters:

VE-12553 Resolved issue where keeping focus on a Price scale Cell when Editing will not save any changes made.

VE-12557 Resolved issue where spaces around the price scale entries for Postcode, Town, etc. would cause that line not to price.

## **Printing:**

VE-11830 Added new functionality to TMS Print Spooler to allow use of 2D Barcodes.

VE-12645 Resolves issue with random characters being printed on label when Schedule Title and Number fields are used, and the job is not on a Schedule.

## **POD Scanning:**

VE-2155 Resolved issue where the filters and layouts drop downs within the lists didn't display in the sort order configured.

## **Vigo Scanning:**

Various changes to improve stability of applications when used in conjunction with latest scanning apps.

VE-11217 Resolves issue where users could add a new blank user into the TMS Cross Dock module.

VE-12389 Now sends any network barcodes stored in the TMS to Mobile Workforce handsets for delivery vehicle scanning.

VE-12423 Cross Dock scanning now recognises barcode values stored against the job in "Otherbarcode" field, providing a 2 digit pallet number is used.

## **New Customer Portal Sync Service:**

VE-7334 Resolved issue with Invoices not sending up to the Portal when a different version of Crystal Reports has been installed on the server.

VE-7739 Resolved issue where Consignments fail to sync between TMS and Portal if Customer has been manually entered on both systems.

VE-9190 Improvements made for large POD/COP images in Sync Service. When images are too large to transfer up to the new Portal, the images are now resized and uploaded automatically.

VE-10193 Resolved issue where addresses longer than 30 characters failed to be priced as site addresses when importing into the TMS.

VE-10196/11969 Resolved issue where Customers printing labels on the Portal caused jobs to be re-routed on TMS.

VE-10408 Resolved issue where COP Images would duplicate where a single image is assigned to multiple TMS orders.

VE-11317 Improvements to Routing sync to Portal. Now whenever any Routing changes are made in the TMS, the whole routing file is batch uploaded to prevent issues with duplications.

VE-11349 Resolved issue where editing the Customer in the TMS would reset the "Automatic Consignment Numbering" setting on Portal.

VE-11485 Resolved error "Cannot cast DBNull.Value to type 'System.DateTime'" when a Schedule is added and deleted before being synced up to the Portal.

VE-11987 Resolved issue with job updates not sending due to "The given key was not present in the dictionary".

VE-12035 Resolved issue with job updates not sending due to "The item may have been modified by another user".

VE-12298 Data from high-volume parcel networks are now excluded from synchronising with the Portal (i.e. APC jobs).

## **New Customer Portal Sync Service (WMS changes):**

VE-10332/10436/10536 Resolved issues with duplicate and missing WMS Picklist Lines transferring to Portal.

VE-10934 Resolved issue where duplicate BIN/DSP charges can occur when Sync Service is delayed.

VE-11996 Resolved issue where Batch Number on the Portal can sometimes get overwritten by subsequent updates on the WMS.

VE-12021/12069 Resolved issues with WMS Charge Trans records preventing sync of other data from WMS. These now run on their own separate thread.

VE-12613/12912 Resolved issues with duplicate and missing WMS Expected Lines transferring to Portal.
